C.B.R. can save up to 75% on energy costs !

ROD Suspension
Insulation System
Sport Facilities

Our design, product quality and installation expertise allows our systems to last over twenty five years!

*"The new insulation & lighting is spectacular. We had ball holes everywhere and our building condensed. The ROD Suspension System eliminated all our problems and the installation crew was the best."
Jim Rosenburger Owner*

Commercial Building & Retrofit, Inc. manufactures and installs safe, energy saving insulation systems. We custom design your system to accommodate any obstructions in your building. Our 85% reflective facing will create a bright playing environment and is ball proof. Your noise levels will be reduced by 75% while eliminating any condensation problems. Our employees are experienced installers that work quickly and cause minimal interference to your ongoing operations. Investment in the ROD Suspension Insulation System and it will pay for itself from energy savings.
