ROD Suspension
Insulation System
R -19

Our insulation experience will save about \$18,000.00 per year in energy cost!

Commercial Building & Retrofit, Inc. took 58,365 sq. ft. of a 132,000 sq. ft. building and turned it into a energy efficient facility for the owner. We insulated the ceiling to a R-19 and created a new look to the west portion of the warehouse.

The savings to the HVAC equipment maintenance and utility cost will pay for the insulation system in a very short time. We have provided a very comfortable working environment for future employees. The total gas bill to heat the 58,364 sq.ft. (west portion of the warehouse) to 68° is projected to save \$18,000.00 per year.
